EXPERIENCE

Fullstack Web Developer at May 2025 – Present

Elnusa Petrofin Medan, Indonesia – Remote

As a Fullstack Web Developer at Elnusa Petrofin, I contribute to the development and maintenance of internal business applications using Remix and NestJS. Working across both frontend and backend systems, I build scalable features, integrate APIs, and develop reusable components to improve development efficiency and consistency. Over the course of my role, I have contributed to the delivery of 7+ business applications supporting various operational needs across the organization.

Fullstack Web Developer at Dec 2022 – Present

Freelance Medan, Indonesia - Remote

As a Freelance Fullstack Web Developer, I have developed and delivered web applications for clients across education, e-commerce, transportation, and business operations. Managing projects from requirements

gathering to deployment and ongoing support, I have successfully delivered 7+ client projects using modern technologies such as React.js, Next.js, Node.js, and Laravel. My focus is on building scalable, responsive, and business-oriented digital solutions that address real operational needs.

Fullstack Web Developer at

Aug 2024 – Jan 2025

Octobees

Medan, Indonesia - Remote

As a Fullstack Web Developer at Octobees, I contributed to the development and maintenance of client-facing web applications using React.js, Next.js, Astro, and WordPress. Working across both frontend and backend systems, I built responsive interfaces, developed APIs, and integrated external services to deliver scalable digital solutions. During my tenure, I contributed to 5+ client projects across various industries.

PROJECTS

SMA Harapan 3 Medan – School Website

Sept 2024

- Developed the official website for SMA Harapan 3 Medan using Next.js, delivering a responsive platform for academic information, school programs, faculty profiles, and student activities. Built with a focus on usability, performance, and accessibility to strengthen the school's online presence.
- Tech Stack : Next Js, Tailwind CSS, Shadcn UI

Sixstreet Medan – Ecommerce Website ([sixstreet.co.id](#))

April 2024

- Developed a full-featured e-commerce website for Sixstreet, supporting online sales of apparel, footwear, and fashion accessories. Implemented responsive user interfaces and optimized the shopping experience to enhance product discovery, customer engagement, and overall usability.
- Tech Stack : React JS, Tailwind CSS, Express JS, Sequelize ORM

Yayasan Pendidikan Harapan Medan – Academic Website ([harapan.ac.id](#))

June 2024

- Developed the official website for Yayasan Pendidikan Harapan, providing a centralized platform to showcase the foundation's vision, educational programs, and institutional initiatives. Built a responsive and accessible web experience to strengthen the foundation's digital presence and improve information accessibility for students, parents, and the broader community.
- Tech Stack : Next JS, Tailwind CSS, Shadcn UI, Prisma, Postgres

SMP Harapan 3 Medan – School Website

October 2024

- Developed the official website for SMP Harapan 3 Medan, providing a digital platform for academic information, school activities, faculty profiles, and student programs. Designed and implemented a responsive web experience that aligns with the institution's branding while improving accessibility and engagement for students, parents, and prospective applicants.
- Tech Stack : Next JS, Tailwind CSS, Shadcn UI

Alvin Jaya Mandiri – VIP Car Rental Website ([alvinjayamandiri.com](#))

January 2025

- Developed a booking and company profile website for AJM, a VIP car rental provider in Medan, enabling customers to explore vehicle collections and rental services through a modern digital platform. Implemented responsive interfaces and optimized user experience to support brand visibility, customer inquiries, and service accessibility.
- Tech Stack : Next.js, Tailwind CSS, JavaScript

Antar Ke Dapur - Food Supply & Ordering Website ([antarkedapur.com](#))

April 2026

- Developed Antar ke Dapur, a role-based commodity procurement and distribution platform designed to streamline ordering, fulfillment, and operational management processes. Built responsive interfaces and business workflows for multiple user roles, including kitchen operators, administrators, and super administrators, while ensuring a consistent user experience and scalable application architecture.
- Tech Stack : Next.js, Tailwind CSS, TypeScript, Shadcn UI, Prisma, Postgres

Fedra Rent – Car Rental Website (fedrarent.com)

May 2026

- Developed a modern car rental platform for FedraRent, enabling customers to discover vehicle options, rental services, and booking information through an intuitive digital experience. Implemented responsive and high-performance interfaces designed to enhance user engagement, strengthen online visibility, and support lead generation initiatives.
- Tech Stack : Next.js, Tailwind CSS, Shadcn UI
